

TekSpan® HDPE Square Foot

Product Code: R605-387

Description

400mm square foot for TekSpan 80mm profiles, for use in supporting frames on rooftop membranes and other sensitive surfaces. Wide loadbearing area reduces risk of point load penetration to roof membrane.

Material

High Impact HDPE (High-Density Polyethylene)
100% Recycled material.

Anti-vibration

Foam pad on the underside of the foot reduces noise transmission and risk of slippage between the roof membrane and foot.

Specification

Length	400mm
Width	400mm
Height	140mm
Profile Slot Depth	104mm
Weight	3.97kg
Safe Working Load	1000kg
Pack Qty	1
